

MALHAR GUJAR

+1 414-324-2886 | [linkedin.com/in/malhar-gujar](https://www.linkedin.com/in/malhar-gujar) | malharmgujar@gmail.com

SKILLS

Programming & Libraries: Python, SQL, JavaScript, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Matplotlib, Seaborn

ML / AI Techniques: Neural Networks (CNN, RNN), Random Forest, Feature Engineering, Cross-Validation, ROC-AUC

AI & Generative Tools: LLM APIs (OpenAI, Claude), Prompt Engineering

Data & Dev Tools: Tableau, Power BI, Git, GitHub, Jupyter Notebook, Google Colab, Linux, MacOS

EXPERIENCE

Research Assistant - University of Wisconsin-Milwaukee

Sept 2026 – Present

- In this role, I'll be contributing to research focused on adolescents, mental health, social media, and the experiences of youth. My responsibilities will include conducting photovoice interviews, recording and coding qualitative interview data, supporting data analysis, working with research participants and advisory board members, and assisting with various research-related activities.

Empyrean Athletic LLC

June 2026 – Aug 2026

Data Analytics Intern

- Building and developing AI models to support NIL deal flow automations and workflow intelligence using Python and ML frameworks, continuously iterating on model performance through structured testing and feedback loops.
- Performing data scraping and structured data collection across NIL, athlete, brand, and market sources, learning to manage and synthesize large multi-source datasets for analytics, benchmarking, and automation use cases.
- Building and testing a deal evaluation model using classification algorithms and feature engineering to support internal decision-making, gaining hands-on experience in translating business requirements into end-to-end ML solutions.
- Sorting, cleaning, and organizing NIL deal data for downstream analytics and automation workflows, developing an understanding of data quality standards and best practices for producing reliable, production-ready datasets.
- Validating datasets and maintaining high standards of data accuracy, consistency, and reliability across workstreams through automated Python-based quality checks, while deepening understanding of scalable data pipeline management.

AICTE NEAT Cell

Jan 2024 – Mar 2024

AI-ML Intern

- Developed an object detection pipeline using TensorFlow/Keras and YOLO on Google's Open Images dataset, detecting real-world objects (people, vehicles, animals) to power an AI-based educational tool demonstrating computer vision concepts to students.
- Processed and analyzed 20,000+ records from AICTE's technical education datasets, performing end-to-end data cleaning (null imputation, deduplication, standardization) and EDA using Python (Pandas, NumPy, Matplotlib, Seaborn) to identify enrollment trends.
- Assisted in developing, training, and evaluating ML classification models; contributed to model selection, hyperparameter tuning, and cross-validation while enhancing performance through systematic feature engineering, achieving measurable accuracy improvements.
- Automated data validation, transformation, and report-generation workflows using modular Python scripts, reducing manual processing time by ~30% and enabling faster iteration across multiple dataset versions.

PROJECTS

FurlInsight – Pet Disease Prediction System | ML Project, Course Project

- Developed an AI-powered pet disease prediction system trained on 2,000+ veterinary records (14 features); integrated an OpenAI API chatbot to explain diagnosed conditions in plain English and filed a copyright for the system.
- Built and compared ML models (Random Forest, Decision Trees, Naive Bayes); Random Forest achieved ~87% accuracy with a 15% performance improvement through optimized feature selection and preprocessing techniques.

EDUCATION

Master of Science, Data Science

May 2027

Relevant Coursework: Machine Learning, Statistical Data Analysis, Big Data Analytics, Data Mining, Deep Learning, Data Visualization, Database Management

Bachelor of Science in Computer Science

May 2025

Relevant Coursework: Data Structures & Algorithms, Human Computer Interaction, Statistics & Probability
